

Hosting and BPO Offerings

BioPharm Systems' hosting offerings provide organizations the confidence that comes with knowing your clinical trials will be running seamlessly in a secure and robust environment. We have been hosting clinical applications for our clients since 2002 and possess a thorough understanding of what is required to make sure you have access to your data at all times, regardless of where you are located in the world.

- 24x7x365 facility management
- Highest levels of security and reliability
- On-site engineers and administrators around-the-clock
- Load testing and performance analysis
- Performance tuning and optimization

In addition to dedicated hosting, BioPharm Systems offers Accel-Host, a distinctive approach to hosting based on virtualization. We developed Accel-Host to provide you with a cost-effective and fast alternative to common hosting services found at other companies.

Accel-Host is a successful and safe clinical application hosting solution, since it:

- Runs different systems and multiple applications on the same physical computer

- Creates multiple virtual machines on a single physical machine, with each virtual machine sharing the resources of that one physical computer across multiple environments
- Comes pre-validated and is managed by us

“*We can't thank you and your team enough for all your support this year.*”

– Advanced Clinical Research Services

We offer two hosting options:

- Traditional Dedicated Hosting
- Accel-Host (Shared Hosting)

About Us

BioPharm Systems is an information technology consulting company that focuses on the life sciences industry. We have extensive experience implementing and hosting clinical trial management, data capture, data warehousing and analytics, safety management, and other solutions for our clients. Our products and services help accelerate the development of new drugs, devices, and therapies. Founded in 1995 and headquartered in California, BioPharm Systems has offices in the United States and United Kingdom.
