

Clinical Data Warehousing and Analytics Services

BioPharm Systems' clinical data warehousing and analytics practice has expertise designing and implementing holistic environments for the analyses and reporting of clinical data from multiple source systems. By working with your organization to build a systematic approach to integration, data analytics, and data reporting, we can help you launch and execute successful individual projects, and achieve a high return on investment. These projects become the foundation for enterprise-wide architecture and enable clinical trials to be conducted more efficiently, while improving scientific insight. If your long-term goal is to increase operational efficiency, reduce risk through improved patient safety monitoring, and prepare more targeted development plans, our stepwise approach can help you reach your goal with minimal risk.

Our clinical data warehousing and analytics practice is exceptionally strong in the implementation of Oracle's Life Sciences Data Hub (LSH) and Clinical Development Analytics (CDA). Organizations continuously rely on us as product experts and trusted advisors for these solutions. We can help your organization understand the features and benefits of both applications and guide you through the implementation process. With our resources and expertise, you will be able to understand your data in an in-depth manner and make more informed decisions.

ORACLE Gold Partner

BioPharm Systems' LSH and CDA experts can assist your organization with:

- Business case development and cost analysis
- Requirements and design management
- Best practice analysis and recommendations
- Implementation and configuration
- Extension development
- Validation
- Hosting
- Training

We are experts in:

Life Sciences Data Hub

Clinical Development Analytics

About Us

BioPharm Systems is an information technology consulting company that focuses on the life sciences industry. We have extensive experience implementing and hosting clinical trial management, data capture, data warehousing and analytics, safety management, and other solutions for our clients. Our products and services help accelerate the development of new drugs, devices, and therapies. Founded in 1995 and headquartered in California, BioPharm Systems has offices in the United States and United Kingdom.
