

Clinical Data Management Services

Companies continuously look to us for guidance and our expertise when it comes to clinical data management and electronic data capture systems. BioPharm Systems began working with Oracle Clinical upon its inception in the mid-1990's. It was our first specialty. We have assisted over 100 companies specifically with implementation and use of this system. To date, BioPharm Systems leads all of Oracle's partners in the number of Oracle Clinical implementations.

Our Oracle Clinical, Remote Data Capture (RDC), and Thesaurus Management System (TMS) experts can help:

- Install and validate systems in your environment, using our pre-built validation suites
- Restructure your business processes and workflows to allow for the most efficient use of systems
- Develop your Global Library standard objects and procedures
- Train your end-user resources, including RDC sites
- Setup studies
- Provide ongoing help desk and support for your internal staff and RDC sites

“BioPharm Systems understands and respects the needs of a growing organization and is able to make recommendations that make sense to meet our business needs now, as well as in the future.”

– Aeris Therapeutics

We are experts in:

- Oracle Clinical
- Remote Data Capture
- Thesaurus Management System

About Us

BioPharm Systems is an information technology consulting company that focuses on the life sciences industry.
