

CTMS Integration Services

You have implemented state-of-the-art enterprise systems for different work functions, but they do not talk to each other. Now what? Savvy organizations know how to maximize their IT investments - they automate interfaces.

BioPharm Systems' clinical trial management practice possesses deep expertise in integrating Oracle's Siebel Clinical with numerous other systems to maximize efficiency and return on investment.

Integrate your CTMS with these systems:

- **Clinical Data Management (CDM) / Electronic Data Capture (EDC):** Import subject and subject visit data to automate the creation of subjects and site payment requests.
- **Interactive Voice Response (IVR):** Import subject and subject visit data to automate the creation of subjects and site payment requests.
- **Financial:** Export payment requests and import details about payments to automate site payment processing.
- **Safety/Pharmacovigilance:** Automatically trigger serious adverse event creation.

- **Electronic Document Management (EDM):** Automatically link CTMS document tracking records to the electronic copies of the documents themselves.
- **Clinical Data Warehouse:** Automatically transfer the data that populates key metrics and performance indicators in dashboards and reports.
- **Systems at Partner Organizations:** Import subject and subject visit data directly from the CTMS or other tracking system at your preferred CRO or partner organization.

BioPharm Systems can help determine the most useful and cost-effective integrations and integration methods for your organization, and can even execute the most complex integration and data migration projects. Let our experts help you maximize the value of your CTMS.
